NEW TO OGF[®]?
ORIGINAL GLUTATHIONE FORMULA**What is the daily suggested use for OGF[®]?**

It is recommended you take all six capsules in the morning, every day, before or after breakfast.

Why isn't there glutathione in this formula?

Original Glutathione Formula[®] is a proprietary blend of vitamins and minerals that support the accelerated production of glutathione naturally in your own body. N-acetyl cysteine (NAC) is used instead of glutathione. N-acetyl cysteine (NAC) helps to replenish intracellular glutathione. It has proven to be an efficient oral source of glutathione as it is well absorbed by the intestine and readily converted to glutathione.

What are the anti-aging benefits of OGF[®]?

Glutathione levels in the body begin to decline in our early 20's and progressively decline as we age. The cause of this decrease may be the body's inability to produce glutathione as efficiently as we age, or it might be that the body requires more glutathione as we get older. Interestingly, certain studies have shown that individuals who have lived 100+ years have naturally high levels of glutathione. OGF can help you

feel and look younger by restoring normal healthy levels of glutathione.

Will OGF[®] help boost my immune system?

Glutathione is the body's primary antioxidant and is found in elevated concentrations into our 20's. As we age, the natural levels begin to decrease. Original Glutathione Formula[®] increases the body's natural production of glutathione, strengthening your body's mechanisms of detoxification and immune function.

Will OGF[®] help protect my lung health?

Glutathione is an important protective antioxidant. Studies show that N-acetyl cysteine (NAC) protects against oxidative stress and inflammation in the lungs.

Will I feel the effects of OGF[®] right away?

Some people will feel the benefits of restful sleep, increased energy, and mental clarity right away. Others may feel lethargic as glutathione removes cell-damaging toxins from your body. Should you be one of the few that experience this, it's a sign of detoxification and should pass quickly. You may want to start with 2 capsules per day and increase the number each week. Within a few weeks, you should feel increased vitality, health, and wellness.
